Completion Of Works

AM05

Actual Costs - Water Reticulation - Sewer Rising Main

Job No.: ..... Town: .....

The Development: ..... Stage No.: .....

Accredited Consultant: .....

The "As Constructed" details together with the following cost information will be used by GVW to record an asset value for individual pipelines.

For each different pipe diameter and different material used in the project, the length and cost per metre are to be detailed. (Costs should include valves, fire plugs and fittings.)

The total cost below should be the same as the total cost of the project.
(For consultant's, it will be the same cost as submitted to GVW as per)
(Develop and Construct Agreement)

*** Costs not directly attributed to the construction of assets should be distributed pro rata across all assets. (ie: contract administration.)**

Water Reticulation / Sewerage Rising Main (circle appropriate item)

Pipe diameter (mm)	Pipe material & Class	Length (m)	Cost / metre* ($ / m)	Total cost $

Total value of works $ _____
